### Trust Nullification of Law.

We are getting so accustomed to hear-ing of the wickedness of the Standard Oil trust that the serial revelations of government press have the flavor of an that the Standard has for years monopolized the pipe lines constructed for the transportation of oil, preventing by every means in its power, both fair and foul, the use of those lines by competing pro ducers or the construction of other lines by rival concerns. What is new and de cidedly interesting in this matter is that the Standard has so far refused to conform to the provisions of recently enacted Federa! legislation making pipe ines common carriers and subject to cer tain Federal regulations. Four great ten tacles of the octopus have neglected to file the tariffs required by law, and hav flatly refused to accept the status of common carrier sought to be imposed on them by law, declining to accept or deliver oil owned by other than Standard
